

I am writing you to talk about low power FM. I understand that you are planning to expand this service in a way that it would take priority over current FM translator service. This will hurt the station that is listen to which is Air 1. This station is broadcast thru translator. (In my area it is 90.1) If this rule is enacted then I and many other people will be left without a positive radio station. This radio station has changed many peoples lives for the better. I believe that without this station many people lives won't be changed.
